Risk matrix – Hackernews clone

Group E

	Insignificant	Minor	Moderate	Major	Catastrophic
Certain					
Likely	Bugs				
Possible				Database breakdown – data loss[i]	Server breakdown – whole system offline
Unlikely		Unwanted database *read* access[ii]		- Exploited code - Unwanted CI-tools access - Unwanted data *modify* access	
Rare					

Endnotes:

[i] All of our data is simulated. So, while it's not a good thing if we lose data, it's not critical.

[ii] Again, our data is simulated. Therefore, the importance of keeping its details private is not very high.
